Asiasoft logs lower net loss

GAMING: SET-listed online entertainment service provider Asiasoft Corporation Plc reported its revenue for the first half of 2017 slightly dropped from the first half of last year. The company did not launch any new games over the period. Asiasoft's net loss dipped from 90 million baht to 10.5 million.

For the second half, the company plans to release new games — seven for PCs and seven mobile — which mainly focus on the co-publishing model to save costs and reduce exposure.
